Technical Skills

Languages & Technologies: HTML5, CSS3, JavaScript, Python, Java, C, SASS, MATLAB, PHP, R

Frameworks: Bootstrap, jQuery, React.js

Other: Windows, Linux/Unix, SQL, Git, Visual Studio, Oracle, ojdbc8, MySQL, JavaFX

Projects

Web Development Portfolio

- Created and designed a portfolio using HTML, CSS, React.js, JavaScript, and EmailJS.
- Emphasized responsiveness and accessibility in the web design process for the best user experience.

Movie Store Database Application

- Developed a fully functional Movie Store application and a relational database from scratch using agile methodologies with Java, JavaFX, Oracle 12, ojdbc8, and SQL earning a 100% Grade.
- Demonstrated excellent communication and problem-solving skills by programming the application without prior JavaFX knowledge and worked with group members to ensure that all aspects of the database were coherent with one another.

ClosedWeather App

- Led a team of 3 members to develop a weather application using HTML, CSS, JavaScript, jQuery, and Bootstrap on the front end, PHP on the back end, and a MySQL database earning a 95% grade.
- Utilized the OpenWeather API and AJAX calls to fetch and update information on the server-side.

MovieDex

- Developed a responsive Movie Database website using React.js, and CSS.
- Implemented The Movie Database API to fetch movie information.
- Used React Hooks to change state of card components and display it in an organized fashion.
